Cantin ROQUIER

Full-Stack & Mobile Software Engineer

React · React Native · Node.js

Brunoy (Paris area), France | cantin.roquier@gmail.com | Driving licence
LinkedIn | GitHub

PROFILE

Engineer graduated from **EFREI Paris** with **6 years of experience** in the IT department of Les Mousquetaires Group (Intermarché), building web and mobile applications used at large scale, from requirements gathering to production release.

PROFESSIONAL EXPERIENCE

STIME — IT Department of Les Mousquetaires Group — Sept. 2020 – Present

Work-study (apprenticeship) from Sept. 2020 to Aug. 2025 — Paris, France

UNICOMS project — Full-Stack Mobile Developer — Mar. 2026 – Present

Team of about twelve · React Native, Expo, React

- Development of a **React Native / Expo app (Android, iOS, web)** for ordering fresh products, used by **1,700 Intermarché stores**, and of its **React web back office**.
- **Redesign of the app's shopping cart**.
- Delivery of new features, including a **news module**, and development of the **front end of the clearance-stock module**.

MAESTRO project — Mobile Developer — Aug. 2025 – Mar. 2026

Team of about 6 · React Native

- Development of a **React Native mobile app** for Intermarché **store owners** to monitor their store's performance: added **numerous key indicators** and dashboards.
- Carried out the app's **API migration**.

MOBILYS ecosystem (Mobilys, Mobilys SAV, MDS) — Full-Stack Developer — Sept. 2020 – Aug. 2025

Team of about fifteen · React Native, React, Node.js

- Active contributor to **Mobilys**, a **React Native mobile app** used by staff in **over 3,000 Intermarché stores** (some modules also at Bricomarché): inventory, expiry-date management, shelf stocking…
- Built **from scratch Mobilys SAV** and **MDS**, two **React web apps** used by **the entire after-sales support team** to troubleshoot stores during incidents.
- Contributed to the **Node.js back-for-front (BFF)** powering the ecosystem's **3 applications**.
- Ongoing **corrective and evolutive maintenance** of the applications (new features and fixes as needed).
- **2021** — Developed **Node.js scripts** extracting data from a fifteen-person team's Jira board to support decision-making: **about 3 hours saved per week**.

Flex Office application — Front-End Developer — Sept. 2020 – Aug. 2021

React · run alongside Mobilys

- Built **from scratch** a **mobile-first React web app** for managing flex office desks.
- Gathered functional requirements in the context of the COVID-19 crisis.

Krakento — Aug. 2024 – Nov. 2024

Engineering internship abroad, during the work-study — Web Developer — Cullera, Spain

- Created **e-commerce websites with Odoo** for individual clients (restaurants, artists, golfers…).
- Continuous gathering of **client requirements** and adjustments based on feedback.
- Designed **mockups in Figma**.

SKILLS

Front-end & mobile: **React**, **React Native**, **Expo**, **TypeScript**, JavaScript, HTML, CSS

Back-end & data: **Node.js** (BFF, scripts), **Supabase** (PostgreSQL, RLS, Edge Functions), **C# .NET** (REST API), **Java**, SQL, Couchbase

Tools & CI: Git, **GitHub**, **GitHub Actions**, **GitLab**, **GitLab CI**, **Docker**, Figma, Odoo

Testing: **Maestro** (maestro.dev — mobile end-to-end testing), **Playwright**

AI: **GitHub Copilot**, **Claude Code** (AI-assisted development)

Methodologies: Agile — Scrum, SAFe, Kanban

Languages: French (native) · **English C1** (TOEIC 900) · Spanish B1

EDUCATION

Master's-level Engineering Degree (Diplôme d'ingénieur) — EFREI Paris **2022 – 2025**
Work-study program — Software & Information Systems track

Professional Bachelor's in Web & Mobile Development — CY Cergy Paris University **2021 – 2022**
Work-study program — Gennevilliers

Two-Year Technical Degree (DUT) in Computer Science — UPEC **2019 – 2021**
1st year full-time, 2nd year work-study

PERSONAL PROJECTS

Tonalli (2026) — emotional-journal PWA, live in production (React, TypeScript, Supabase / PostgreSQL RLS, WebGL, Web Push), built with AI assistance (**Claude Code**). (watch the demo) (try the app)

Magellan (2026) — cross-platform travel journal with a 3D globe (React Native / Expo, TypeScript, three.js): GitHub Actions CI set up by hand, AI-assisted development (**Claude Code**). (watch the demo)

Galactic Escape — 3D endless-runner game inspired by Temple Run, built with Three.js. (watch the video)

Visit Match (engineering school project) — travel-assistant mobile app built with Flutter, with an accompanying business plan. (watch the video)

Shard, C# .NET REST API — space strategy game built as a team, validated by xUnit tests.

Metro — Java application computing the shortest route between two metro stations. (watch the video)

INTERESTS

- **Combat sports:** savate (French kickboxing), MMA, Brazilian jiu-jitsu
- **Sports:** tennis, climbing, hiking, swimming, running
- **History** and **travel**
